NOTE: Due to random rounding of cell values, computed totals and displayed totals of cell values may not agree. Also, Census and Yukon Health Care population figures differ by 9.1% in 1986 and 9.2% in 1981 due to under enumeration by the Census (between 5.3% and 8.1% in 1981) and because the Census is a "de jure" population (one that identifies themselves as fully resident in a region) whereas Health Care figures are a "current" or "de facto" population (those who are here at least long enough to register for Health Care services or to be employed).
